Challenges of CBIR

The Semantic Gap

*"The semantic gap is the **lack of coincidence** between the information that one can extract from the **visual data** and the **interpretation** that the same data have for a user in a given situation." – Smeulders et al.*

The Sensory Gap

*"The sensory gap is the gap between the **object in the world** and the information in a (computational) description derived from a **recording of that scene**." – Smeulders et al.*
